

CCNA SYLLABUS

Fundamental

- Number system
- Medium, utp cable, NIC, straight & cross cable, Auto mdix
- Mac parameter
- IP parameter network id, firstip, lastip, broadcastip, subnetmask
- Lan communication for two pc
- Ping, RDP, netbios, foldersharing, SMB
- OSI & TCP IP stack
- ARP protocol, Arp table
- Understanding network device Hub, Switch, Router
- Understanding system route table
- Understanding default gateway
- Static route configuration
- ARP in layer2 and 3
- Understanding Tcp & Udp, Threeway handshake
- Server&services http, https, port no, tcp, udp, datacenter
- Understanding basic linux command
- Understanding DHCP & DHCP-Relay, dora process
-

CORE

- ACL access control list standard acl, extended acl
- Network address translation, static nat & dynamic overload nat
- Internet, Intranet, edge device, lan, wan
- Router booting

CORE ROUTING

- RIP Routing information protocol
- EIGRP Enhanced interior gateway routing protocol
- OSPF Open shortest path first
- BGP Border gateway protocol

Switching

- Vlan
- Trunk, tagging protocol
- Static trunk, dynamic trunk
- Native vlan
- Spanning tree protocol
- Etherchannel lacp, pagp
- Intervlan communication using layer3 switch
- Intervlan communication using router
- SVI vs Router on-a-stick
- HSRP VRRP
- ISP Failover
- Floating static
- Floating ip

Extra content

- VTP
- Arp poisoning
- Port security
- RIPv2
- Active directory
- Virtualisation
- TP-link loadbalancer
- MTU MSS Four-way handshake
- TCP,UDP,IP header indepth
- TTL
- Traceroute
- PVSTP,RSTP

Other vendor for my lovable students

- Basic switching command in juniper EX-3300 real-device
 - Basic switching command in Aruba 2920G real-device
- More switches to be added.....
